

The **National Institute of Disaster Management (NIDM)** was constituted under an Act of Parliament with a vision to play the role of a premier institute for capacity development in India and the region. The efforts in this direction that began with the formation of the National Centre for Disaster Management (NCDM) in 1995. Gained impetus with its redesignation as the National Institute of Disaster Management (NIDM) for training and capacity development. Under the Disaster Management Act 2005, NIDM has been assigned nodal responsibilities for human resource development, capacity building, training, research, documentation and policy advocacy in the field of disaster management.

NIDM, Delhi

NIDM, Vijayawada (South Campus)

NIDM has performed a key role in bringing disaster risk reduction to the forefront of the national agenda. The Institute believes that disaster risk reduction is possible only through promotion of a "Culture of Prevention" involving all stakeholders and community. The Institute works through strategic partnerships with various ministries and departments of the central, state and local governments, academic, research and technical organizations in India and abroad and other bi-lateral and multi-lateral international agencies.

NIDM is proud to have a multi-disciplinary core team of professionals working in various aspects of disaster management. In its endeavour to facilitate training and capacity development,

the Institute has state-of-the-art facilities like class rooms, seminar hall and video-conferencing facilities etc. The Institute has a well-stocked library exclusively on the theme of disaster management and mitigation. The Institute provides training in face-to-face, on-line and self-learning mode.

NIDM provides Capacity Building support to various National and State level agencies in the field of Disaster Management & Disaster Risk Reduction. The Institute's vision is to create a Disaster Resilient India by building the capacity at all levels for disaster prevention and preparedness.

Inspired by the Hon'ble PM 10 point agenda on DRR, the Institute is committed to make all out efforts towards achieving aim of Disaster Resilient by building the capacity at all levels for disaster prevention and preparedness.

Genesis & Functions

In the backdrop of the **International Decade for Natural Disaster Reduction (IDNDR)**, a National Centre for Disaster Management was established in **1995** in the Indian Institute of Public Administration (IIPA) by the Ministry of Agriculture and Cooperation, the nodal ministry for disaster management in the country.

The Centre was upgraded as the **National Institute of Disaster Management (NIDM)** on **16th October 2003**, following the transfer of the subject of disaster management to the Ministry of Home

Affairs. The Institute was inaugurated by Hon'ble Union Home Minister on **11th August, 2004**.

The Institute achieved the status of a **statutory organisation** under the **National Disaster Management Act, 2005**. Section 42(8) of the Act has made the Institute responsible for *“planning and promoting training and research in the area of disaster management, documentation and development of national-level information base relating to disaster management policies, prevention mechanisms and mitigation measures.”*

Section 42(9) of the Act has assigned the following specific functions to the Institute:

- a. Develop training modules, undertake research and documentation in disaster management and organize training programs.
- b. Formulate and implement a comprehensive human resource development plan covering all aspects of disaster management.
- c. Provide assistance in national level policy formulation.
- d. Provide required assistance to the training and research institutes for development of training and research programs for stakeholders including Government functionaries and undertake training of faculty members of the State level training institutes.
- e. Provide assistance to the State Governments and State training institutes in the formulation of State level policies, strategies, disaster management framework and any other

assistance as may be required by the State Governments or State training institutes for capacity-building of stakeholders, Government including its functionaries, civil society members, corporate sector and people's elected representatives.

- f. Develop educational materials for disaster management including academic and professional courses.
- g. Promote awareness among stakeholders including college or school teachers and students, technical personnel and others associated with multi-hazard mitigation, preparedness and response measures.
- h. Undertake, organise and facilitate study courses, conferences, lectures, seminars within and outside the country to promote the aforesaid objects.
- i. Undertake and provide for publication of journals, research papers and books and establish and maintain libraries in furtherance of the aforesaid objects.
- j. Do all such other lawful things as are conducive or incidental to the attainment of the above objects.
- k. Undertake any other function as may be assigned to it by the Central Government.

Vision, Mission & Strategic Plan

Vision

- To be a premier Institute of Excellence for training and research on disaster risk mitigation and management in India and to be recognized as one of the leading Institutions at the International level in the field.
- To strive relentlessly towards making a disaster-free India by developing and promoting a culture of prevention and preparedness at all levels.

Mission

- To work as a think tank for the Government by providing assistance in policy formulation and:
- To facilitate in reducing the impact of disasters through:
 - Planning and promoting training and capacity building services including strategic learning.
 - Research, documentation and development of national level information base.
 - System development and expertise promotion for effective disaster preparedness and mitigation.
 - Promoting awareness and enhancing knowledge and skills of all stakeholders.
 - Strengthening institutional mechanisms for training and capacity building of all stakeholders.
 - Networking and facilitating exchange of information, experience and expertise.

Strategic Plan

- To build a national hub to share and learn and to create a critical mass of institutions, trainers and trained professionals.
- To undertake quality research covering both natural and human-induced disasters, with a multi-hazard approach.
- To work as a National Resource Center for the central and state governments in the country through effective knowledge management and sharing of best practices.
- To professionalise disaster risk reduction and emergency management in India and other neighboring countries by developing an independent cadre of professionally trained emergency and mitigation managers.
- To promote formal training and education for disaster management in India and in the region.
- To build working partnerships with the Government, universities, NGOs, corporate bodies and other national and international Institutes of eminence.
- To link learning and action by building a synergy between institutions and professionals in the sector.

Management Structure and Organizational Overview

As per the **National Institute of Disaster Management Rules, 2006**, it has two bodies namely the **Institute Body** and the **Governing Body**. The Institute Body consists of 42

members comprising Secretaries of various Nodal Ministries/Departments of Government of India and State Governments, heads of relevant national-level scientific, research and technical organizations, besides eminent scientists and DRR practitioners. Hon'ble Union Home Minister is the President of the Institute. NIDM has been working within the broad policies and guidelines laid down by the National Disaster Management Authority.

The Institute has a **Governing Body** of 14 members chaired by the Vice Chairperson of the National Disaster Management Authority and the Home Secretary as Vice Chairperson. Since the Vice Chairperson post of NDMA is vacant, the Home Secretary is the Chairperson of the Governing Body. The Executive Director runs the day-to-day administration of the Institute.

The Institute has the following six academic divisions:

1. **Governance & Inclusive DRR Division (GIDRR)**
2. **Disaster Response & Recovery Division (DR&R)**
3. **Geo-Meteorological Risk Management Division (GMRD)**
4. **Resilient Infrastructure Division (RID)**
5. **CBRN & Cyber Risk Management Division (CRMD)**
6. **Environmental Disaster Risk Management Division (EDRM)**

Besides these divisions, the Institute has **21 centres** and **7 functional coordination cells**.

The Governance and Inclusive Disaster Risk Reduction Division (GIDRR)

is part of India's broader disaster management framework, specifically focusing on incorporating inclusive practices and good governance principles into disaster risk reduction (DRR) efforts. It emphasizes the participation of all stakeholders, including vulnerable groups like persons with disabilities, in the planning and implementation of DRR strategies.

Here's a more detailed breakdown:

1. Core Principles:

- **Inclusivity:**

GIDRR aims to ensure that DRR strategies are inclusive of all segments of society, particularly vulnerable groups, to ensure no one is left behind in disaster preparedness and response.

- **Good Governance:**

It promotes transparency, accountability, and participatory decision-making in DRR efforts, ensuring that all stakeholders are involved and have a voice.

2. Key Initiatives and Guidelines:

- **Disability-Inclusive DRR (DiDRR):**

The National Disaster Management Authority (NDMA) has issued guidelines on DiDRR, aligning with international frameworks like the [Sendai Framework for Disaster Risk Reduction](#) and national laws like the [Rights of Persons with Disabilities Act](#), 2016.

- **National Platform for Disaster Risk Reduction (NPDRR):**

Established by the Government of India to facilitate broad-based engagement of various stakeholders in DRR, including government agencies, scientific institutions, NGOs, and community representatives.

- **Community-Based DRR (CBDRR):**

GIDRR also emphasizes community participation in DRR, recognizing that local knowledge and practices are crucial for effective disaster preparedness and response.

3. Role of different actors:

- **NDMA:**

Plays a central role in developing policies, guidelines, and frameworks for DRR, including those related to disability inclusion.

- **National Institute of Disaster Management (NIDM):**

Provides training, research, and capacity building support for DRR, with a focus on inclusive approaches.

- **State Disaster Management Authorities (SDMAs):**

Responsible for implementing DRR measures at the state level, incorporating the principles of GIDRR.

- **Civil Society Organizations (CSOs) and NGOs:**

Play a vital role in community-based DRR, working directly with vulnerable groups and promoting local participation.

4. Key Objectives:

- To build a safer and more disaster-resilient India by integrating DRR into all development planning.
- To ensure that the needs of all segments of society, especially vulnerable groups, are addressed in DRR efforts.
- To foster a culture of prevention, mitigation, and preparedness through collaborative and inclusive approaches.

In essence, GIDRR is a crucial component of India's overall disaster management strategy, promoting a more inclusive

and effective approach to reducing disaster risk and building community resilience.

In India, the Disaster Response & Recovery Division (DRR) is an integral part of the broader Disaster Management

framework. It focuses on strengthening the capacity of state and district disaster management authorities, incorporating risk reduction into development programs, and enhancing post-disaster recovery efforts. The DRR division works in conjunction with other key bodies like the National Disaster Management Authority (NDMA) and the National Disaster Response Force (NDRF).

Here's a more detailed look:

Key Components of DRR in India:

- National Disaster Management Authority (NDMA):

As the apex body for disaster management, the NDMA is responsible for laying down policies, plans, and guidelines for disaster management.

- State Disaster Management Authorities (SDMAs):

These authorities are responsible for disaster management within their respective states, working under the guidance of the NDMA.

- National Disaster Response Force (NDRF):

This specialized force is dedicated to responding to both natural and man-made disasters, operating under the NDMA.

- State Disaster Response Fund (SDRF):

This fund, established under the Disaster Management Act, 2005, provides financial assistance to state governments for immediate relief during notified disasters.

- **Disaster Risk Reduction (DRR) Programs:**

These programs aim to integrate risk reduction strategies into various development sectors, enhancing preparedness and mitigation efforts.

- **National Platform for Disaster Risk Reduction (NPDRR):**

This platform facilitates discussions and collaborations among various stakeholders to advance DRR initiatives in India.

Focus Areas of DRR:

- **Strengthening institutional capacity:**

DRR efforts focus on building the capacity of SDMAs, District Disaster Management Authorities (DDMAs), and other relevant institutions.

- **Integrating risk reduction:**

Integrating disaster risk reduction principles into development planning and sectoral programs is a key priority.

- **Promoting community resilience:**

DRR initiatives aim to enhance community awareness, preparedness, and their ability to cope with disasters.

- **Improving post-disaster recovery:**

DRR also encompasses efforts to restore critical community functions and rebuild infrastructure after a disaster.

Recent Initiatives and Vision:

- India has shifted from a relief-centric approach to a proactive, multidisciplinary approach to DRR, emphasizing early warning systems and risk mitigation, [according to the Ministry of Home Affairs](#).
- There is a focus on building robust systems to support neighboring countries in disaster management, particularly through early warning systems.
- The vision is to advance the work on the [Prime Minister's ten-point agenda on DRR](#) and strengthen overall disaster risk management governance.

Ministry of Home Affairs

The Prime Minister has enunciated ten-point agenda on Disaster Risk Reduction (DRR) during the Asian Ministerial Conference on Disaster Risk Reduction (AMCDRR) held in New Delhi in November 2016. The all-inclusive agenda presents a holistic approach to disaster risk reduction and addresses a whole range of issues, from community preparedness to use of technology and international cooperation.

The Prime Minister's ten-point agenda on DRR is as under:

1. All development sectors must imbibe the principles of disaster risk management.

- 2. Risk coverage must include all, starting from poor households to SMEs to multi-national corporations to nation states.**
- 3. Women's leadership and greater involvement should be central to disaster risk management.**
- 4. Invest in risk mapping globally to improve global understanding of nature and disaster risks.**
- 5. Leverage technology to enhance the efficiency of disaster risk management efforts.**
- 6. Develop a network of universities to work on disaster-related issues.**
- 7. Utilise the opportunities provided by social media and mobile technologies for disaster risk reduction.**
- 8. Build on local capacity and initiative to enhance disaster risk reduction.**
- 9. Make use of every opportunity to learn from disasters and, to achieve that, there must be studies on the lessons after every disaster.**
- 10. Bring about greater cohesion in international response to disasters.**

The Prime Minister's ten-point agenda provides practical guidance and added impetus to implement Sendai Framework for Disaster Risk Reduction (SFDRR) 2015 adopted by 187 countries, including India. Each of the ten points on the Prime Minister's ten-point agenda is aligned with one or more priorities of action of SFDRR. It requires

action by not only disaster management agencies but all parts of the Government at all levels. Since the enunciation of Prime Minister's ten-point agenda, the Government has taken many steps towards its implementation. Steps taken by the Government for implementation and follow-up on Prime Minister's ten-point agenda are annexed.

Annexure

Major steps taken towards the implementation of Prime Minister's ten-point agenda on DRR:

- 1. All development sectors must imbibe the principles of disaster risk management.**
- i. National Disaster Management Authority (NDMA) has developed the first National Disaster Management Plan (NDMP) in 2016. The plan was revised in 2019 and is aligned with the ten-point agenda. The revised NDMP brings together all the sectors, ministries and departments at Central and State level as well as district level functionaries and defines their respective roles and responsibilities in disaster risk reduction.**
- ii. NDMA has been reviewing, providing inputs and approving the Disaster Management Plans of different ministries and departments. So far, NDMA has approved 36 disaster management plans of different Ministries / Departments.**
- iii. In order to ensure that development sectors imbibe the principles of disaster risk management, NDMA has been supporting the development of sector specific standards, codes and guidelines. NDMA has developed the**

standardization and upgradation of codes and bye-laws of Seismic design of pipelines, performance-based design and seismic design and detailing of new structures for steel buildings.

- iv. After the Prime Minister's announcement that India will work towards establishing the Coalition for Disaster Resilient Infrastructure (CDRI), a series of global, regional and national consultations were held to forge a consensus around the contours of the coalition. On 23rd September, 2019, the coalition was launched by Prime Minister at the United Nations Climate Action Summit, in New York. So far, 37 countries and 7 other organizations have endorsed its charter and joined as Members. CDRI is presently supporting 13 Small Island Developing Countries in making their infrastructure systems disaster resilient. In addition, CDRI is working on integrating disaster resilience in specific development sectors such as Power and Telecommunications.**

- 2. Risk coverage must include all, starting from poor households to SMEs to multi-national corporations to nation states.**

NDMA, as per the recommendations of fifteenth Finance Commission, has been working with several national institutions like Insurance Regulatory and Development Authority of India (IRDAI), General Insurance Corporation of

India (GIC Re) and Insurance Institute of India (III) as also with multilateral institutions like Asian Development Bank, United Nations Development Programme and World Food Programme in designing insurance products.

3. Women's leadership and greater involvement should be central to disaster risk management.

- i. While revising the NDMP, issues relating to women empowerment and their leadership role in disaster risk management has been given prominence.**
- ii. Participation of women in disaster risk management is increased through imparting training to women as Aapda Mitra volunteers, maintenance and management of Cyclone Shelter Management & Maintenance Committees (CSMMC) in the country through 50% women participation. Out of 94,197 trained Aapda Mitra volunteer, 16,822 are female.**
- iii. Key roles to women are ensured in various Task Force Groups related to disaster preparedness and rescue operations, training and mock drills etc.**
- iv. Mahila Contingent from Central Armed Police Forces (CAPFs) are also trained and deployed for National Disaster Response Force (NDRF) for disaster management.**

4. Invest in risk mapping globally to improve global understanding of nature and disaster risks.

- i. NDMA has developed a web-based Dynamic Composite Risk Atlas and Decision Support System (Web-DCRA & DSS tool) for cyclone risk mitigation and response planning. The tool has been successfully used in recent cyclones such as Biparjoy (June, 2023) and Cyclone Michaung (December, 2023)**
- ii. Government has taken steps to update hazard risk information and make it easily accessible to all infrastructure sectors so that all projects are disaster resilience.**
- iii. Flood Hazard Atlas have been developed by National Remote Sensing Centre (NRSC) for flood prone states of West Bengal, Andhra Pradesh, Bihar, Odisha, Assam and Uttar Pradesh and for comparatively less flood affected states such as Jammu & Kashmir, Tamil Nadu, Kerala, Gujarat, Arunachal Pradesh, Karnataka and Maharashtra.**
- iv. Building Material & Technology Promotion Council (BMTPC) has developed a digital atlas that captures the vulnerability of various parts of the country to different hazards. All States and UTs have been sensitised to use this information in project preparation.**
- v. NRSC has prepared a comprehensive data set of 28,000 glacial lakes in the Indian Himalayan Region.**
- vi. National Centre for Seismology has prepared a seismic micro-zonation of Delhi and has supported seismic micro-zonation of several other cities.**

5. Leverage technology to enhance the efficiency of disaster risk management efforts.

- i. India Metrological Department (IMD) issues regular and precise weather forecasts & warning bulletins including for cyclones to all the affected/ likely affected States/ UTs.**
- ii. IMD uses a suite of quality observations from Satellites, Radars and Conventional & Automatic Weather Stations for monitoring of cyclones developing over the Bay of Bengal and Arabian Sea. It includes INSAT 3D, 3DR and SCATSAT satellites, Doppler Weather Radars (DWRs) along the coast and coastal Automated Weather Stations (AWS), High wind speed recorders, Automatic Rain Gauges (ARGs), Meteorological buoys and ships.**
- iii. Under the National Cyclone Risk Mitigation Project (NCRMP) Early Warning Systems have been installed in the Coastal States, which have proved to be of great help in alert dissemination to the coastal community during recent cyclones.**
- iv. 'Common Alerting Protocol (CAP) based Integrated Alert System' has been initiated with an outlay of Rs. 354.83 Crore, for dissemination of geo targeted early warnings/alerts related to disasters to the citizens of India for all 36 States/UTs using various disseminating medium like SMS, TV, Radio, Indian Railways, Costal Sirens, Cell broadcast, Internet (RSS feed & Browser Notification),**

Satellite Receiver of GAGAN & NavIC etc., through integration of all alerting agencies, [India Meteorological Department (IMD), Central Water Commission (CWC), Indian National Centre for Ocean Information Services (INCOIS), Defence Geo-informatics Research Establishment (DGRE), Geological Survey of India (GSI) and Forest Survey of India (FSI)]. In CAP system, the alerts related to various disasters are generated by Alert Generating Agencies like IMD, CWC, INCOIS, DGRE & FSI and moderated by SDMAs of concern States/UTs. The alerts are sent

to geo targeted areas in regional languages. There is a web-based dashboard to disaster managers for approving/editing alerts and choosing media for dissemination. The system has been used successfully in recent disasters.

- v. Emergency Response Support System (ERSS) is a Pan-India single number (112) based emergency response system for citizens in emergencies. Citizens can request help through Voice Call, SOS, SMS, Email, Web Request and Panic buttons on a mobile app to request for immediate assistance pertaining to events related to Police assistance, Fire, Ambulance, Women protection, Child safety etc. For seeking assistance related to disaster in country, various disaster helpline numbers in States/Districts are operational. In order to implement the vision of Prime Minister for 'Single Distress Number for all emergencies across the country' the Project "Extension of ERSS" with existing single number

“112”, has been initiated, which will also cater for emergency call related

to disasters. This project has been designed to leverage technology for a swift response to distress calls related to disaster thus mitigating loss of life and property.

- vi. The National Disaster Management Information System (NDMIS) has been launched for development of a comprehensive online module for capturing sector-wise data on disaster losses upto district level and to monitor progress on various targets of the Sendai Framework for Disaster Risk Reduction (SFDRR).**

6. Develop a network of universities to work on disaster-related issues.

Indian Universities and Institutions Network (IUINDRR-NIDM) has been established, under the aegis of National Institute of Disaster Management (NIDM), to highlight the role of education, research and training in disaster resilience and to develop model curricula for DRR with its integration at various levels. The IUINDRR provides a platform for interface between academia and policy. It also provides a platform for collaborative development of knowledge products on disaster risk reduction. So far, 260 Universities and Institutes have joined the network.

7. Utilise the opportunities provided by social media and mobile technologies for disaster risk reduction.

- i. A number of new mobile Applications such as Damini, Mausam, Sachet etc. have been developed for timely dissemination of early warnings and alerts to the common people.**
- ii. Various social media platforms are extensively used for awareness generation activities, Do's & Don'ts in the form of text, short films, FAQs are shared from time to time on social media Platforms by NDMA and State Disaster Management Authorities (SDMAs).**
- iii. NDMA also uses social media channels to update the public on ongoing disaster events and the governments' response to them. The Social Media is also used to amplify the reach of content delivered on print media (such as OpEd written by NDMA officers) and broadcast media (such as "Aapada Ka Samna" programmes).**

8. Build on local capacity and initiative to enhance disaster risk reduction.

- i. In order to deepen disaster preparedness and response capacity at the local level in the country, Aapda Mitra Scheme, having an outlay of Rs. 369.40 Crore, has been launched to train 1,00,000 community volunteers in disaster**

rescue in 350 multi-hazards disaster prone districts, covering all States/UTs. So far, 94,197 Aapda Mitra volunteers have been trained. Each volunteer – Aapda Mitra or Aapda Sakhi – is given two-week intense training in disaster response (relevant to their area of operations), equipped with an Emergency Responder Kit (ERK), and provided an insurance cover for five years. In addition, each district is provided an Emergency Essential Resource Reserve (EERR) for the use of Aapda Mitra during disasters.

- ii. In order to empower citizens to take charge of their own resilience to disasters, NDMA has been producing knowledge products that address their needs. For example,
 - a. Home Owner's guide for Earthquake & Cyclone safety (2019), provides details to those who are constructing a house and who are buying a flat in multi-storey buildings, which are made of either masonry or reinforced concrete (RCC)
 - b. Simplified Guidelines for Earthquake Safety (2021), provides minimum requirements that have to be complied with while constructing earthquake resistant house.
- iii. Under NCRMP, 24,007 Government officials from various priority sectors viz., Health, Education, Panchayat Raj Institutions, Urban Local Bodies, and Rural Development have been trained through 925 Capacity Building Trainings. 68,988 community representatives have been trained on various disaster response skills viz., First Aid, Search &

Rescue, and Shelter Management through 3,421 Shelter Level Trainings.

- iv. NDRF regularly conducts Mock Exercises in all 36 States / UTs on community disaster awareness in Floods, Cyclones, Earthquake, Landslide & Chemical, Biological, Radiological, and Nuclear (CBRN) in vulnerable areas with various stakeholders of Disaster Management / Response. NDRF also conducts School Safety Programme (SSP) to impart training on disaster response to children in vulnerable schools in all 36 States/UTs of India.**
 - v. Mock exercises and community awareness programmes are regularly conducted by NDMA and NDRF to create awareness among people.**
- 9. Make use of every opportunity to learn from disasters and, to achieve that, there must be studies on the lessons after every disaster.**
- i. In the aftermath of major disasters, NIDM as well as NDMA undertake field visits to document the lessons learned. Example of such studies include: Biparjoy cyclone (June 2023); Good Practices in COVID response (2022); Gaja cyclone (September 2019); Tamil Nadu Floods (September 2017)**

- ii. **NDMA has issued thirty-three (33) guidelines for management of hazard specific disaster on various thematic and cross-cutting issues.**

10. Bring about greater cohesion in international response to disasters.

- i. **Government has advanced regional cooperation on disaster risk management through active engagement under multiple regional organizations, such as Shanghai Cooperation Organization (SCO), Bay of Bengal Initiative for Multi-Sectoral Technical & Economic Cooperation (BIMSTEC) and Indian Ocean Rim Association (IORA). Through these organizations, Government has conducted joint exercises as well as facilitated sharing of good practices in disaster management.**
- ii. **Effective national and international response to disasters was discussed during the deliberations of Disaster Risk Reduction Working Group established under India's G20 presidency.**
- iii. **The Government has been providing Humanitarian Assistance and Disaster Relief Support to disaster hit countries. Under the spirit of 'Vasudhaiva Kutumbakam', Government of India had extended immediate help to Turkiye and Syria, hit by massive earthquake in February, 2023, by dispatching NDRF and medical teams along with relief materials.**

This was stated by the Minister of State for Home Affairs, Shri Nityanand Rai in a written reply to a question in the Lok Sabha.

The National Disaster Management Authority (NDMA), headed by the Prime Minister of India, is the apex body for Disaster Management in India. Setting up of NDMA and the creation of an enabling environment for institutional mechanisms at the State and District levels is mandated by the Disaster Management Act, 2005. NDMA is mandated to lay down the policies, plans and guidelines for Disaster Management. India envisions the development of an ethos of Prevention, Mitigation, Preparedness and Response.

The Indian government strives to promote a national resolve to mitigate the damage and destruction caused by natural and man-made disasters, through sustained and collective efforts of all Government agencies, Non-Governmental Organizations and People's participation. This is planned to

be accomplished by adopting a Technology-Driven, Pro-Active, Multi-Hazard and Multi-Sectoral strategy for building a Safer, Disaster Resilient and Dynamic India.

The NDMA Logo reflects the aspirations of this National Vision, of empowering all stakeholders to improve the effectiveness of Disaster Management in India. NDMA has 5 major divisions viz. Policy & Plans, Mitigation , Operations & Communications & Information & Technology , Administration and Finance.
